## COMFORT:

- accurate taste transferring and a longer process without changing the bowl; always clean hookah mixture (tobacco); a reduced probability of overheating and excessive intake of carbon monoxide
- holds up to four 25 mm coals
- precise heat adjustment
- convenience of carrying the hookah as coals, bowls, molasses catcher and mouthpiece are fixed
- convenience of replacing coals and bowls without removing the Heat Management System
- quick cleaning under running water together with "burning" coals, as well as cleaning with any detergents
- possibility of heating the Heat Management System up on the stove

## SAFETY:

- protection against damage to furniture and floor coverings
- safe movement with the hookah (carrying in hands, by car, by water transport)
- protection against burns - the Heat Management System is installed, removed and transferred without tongs. The handle stays cold
- it is safe for the table surface to put on, even with charcoal

**ideaBase technology.** Functional double bottom of the Heat Management System (Heat Management System). Protection against tobacco combustion and ingress of ash

**Material:** stainless steel

• The meccano-type design. You can choose the model that suits you best: in addition with a handle and/or lid

• Accurate taste transferring and a longer process without changing the bowl; always clean hookah mixture (tobacco); a reduced probability of overheating and excessive intake of carbon monoxide.

• Stability on the bowl due to fixing lugs in the shape of letters

• Holds up to four 25 mm coals

• Elegant wooden handles

• Quick cleaning under running water together with "burning" coals, as well as cleaning with any detergents

• It is safe for the table surface to put on, even with charcoal

• Possibility of heating the Heat Management System up on the stove

**Durability of the Heat Management System:** 2 years warranty from Watta, the period of use is not limited. The Heat Management System does not rot or rust

**Heat Management System diameter:** 76 mm
