WATTAKEEPER

HEAT MANAGEMENT DEVICE (HMD) WATTAKEEPER GRAND

Art.WAT40503

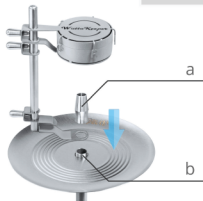

Instr.WAT40503 1

INSTRUCTIONS FOR USE

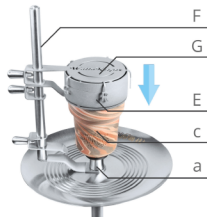

STEP 1:

- unscrew the cone (a) of the upper part of the shaft (b);
- without removing the ashtray, place the HMD with the stand onto the top of the shaft (b);
- screw the cone (a) back to its original position.

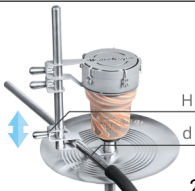

STEP 2:

- place the bowl (with the mixture) (c) on the cone (a);
- use the handles to fix the position of the HMD (E) on the stand (F) so that the base fits the bowl (c) tight;
- use the cover (G) to adjust the heating of the mixture.

STEP 3:

- install the holder (H) for the mouthpiece (d) according to the size of your mouthpiece.

2

IDEABASE TECHNOLOGY

- Functional double HMD bottom. Protection against ingress of coal particles, ash, coal combustion products. Tobacco always stays clean.
- Uniform heating of tobacco without thermal shock protects the hookah mixture from local overheating.
- Replacement of coals is needed to maintain heat only, it is not necessary to flick off the ash from the HMD.

MADE FROM FOOD-GRADE STAINLESS STEEL AISI 304

- Stainless steel ensures reliability and durability of the structure.

*When heated, stainless steel may acquire a bronze tint.

3

The stand is fixed by a hookah cone on the ashtray. WattaKeeper is used for hookahs with a threaded shaft connection, i.e. with a cone (the thread height above the ashtray is from 5 mm, the outer diameter of the shaft is up to 18 mm).
