What else should you know?

- Before the first use make sure you wash the hookah for hygiene purposes.
- For your convenience, Watta 18 + hookahs have a temporary water level mark on the vase. Use it to remember the recommended water level, and then remove it.
- Use Watta WAT50108 disposable mouthpieces for the metal mouthpiece for personal hygiene.
- Use the additional WAT59145 set if you have lost the balls in the valve or to replace the grommets with new ones.

What is the warranty period?

Watta brand products are guaranteed for 18 months. The warranty period covers non-mechanical damage and manufacturing defects.

Where can I learn more?

Description, technical specifications, photos and video materials are available on the information portal watta.si

**We hope that the use of the hookah will be comfortable and bring you a good mood :)**
